

Monthly Air Pollution Control Program Summary Report

Concerns Received or Investigated Between

September 16, 2024 and October 15, 2024

Concerns Received During Report Period

	Total
Total	144
Asbestos	6
Fugitive Particulate Matter	10
Hazardous Air Pollutant Release	3
Odor	60
Open Burning	51
Other	11
Particulates	3

Number of Notices of Violation (NOV) Issued: 0

Number of Referral Notices of Violation (RNOV) Issued: 0

Number of Letters of Warning (LOW) Issued: 8

Concerns Investigated During Report Period

	Total
Total	143
Concerns Received Before Report Period	17
Concerns Received During Report Period	126

Note: Concern Type refers to the air category the concern falls under. There may be more than one type associated with an individual concern, therefore the totals listed here may not reflect the total number of concerns received during the reporting period.

Note: Concern Info refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations made. Those statements of allegations do not necessarily reflect the legal standard upon which inspections would be made.

Monthly Air Pollution Control Program Detail Report

Concerns Received or Investigated Between

September 16, 2024 and October 15, 2024

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58868	8/19/2024	9/22/2024	IsoNova Technologies	Odor	SWRO /Lawrence	JW	Site Visit	

Concerned Party: Willard Bontrigger

Concern Info: Willard Bontrigger called to report that IsoNova Technologies released significant odors over the weekend. Bontrigger is aware that IsoNova Technologies has an RTO to reduce odors, but he suspects that the facility is not using the RTO outside of business hours. Bontrigger says the smell is the worst on the weekends and overnight. Bontrigger lives directly north of IsoNova Technologies.

Conclusions: SharePoint #10694

I drove by the facility at 8:43 a.m. to assess whether the odors were bad enough to initiate an investigation. The wind was out of the southwest at roughly 3 mph. I did not use my nasal ranger because I could not smell significant odors deriving from the IsoNova Technologies facility. I drove around the property boundary several times in case the odor levels fluctuated, but I did not notice any major increases in odor intensity during this visit. I left the region at 8:55 a.m.

I did not observe any violations during this investigation. No action is required.

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
59023	9/3/2024	9/27/2024	unknown	Odor	SWRO /Jasper	JW	Other	

Concerned Party: Nicole Watson

Concern Info: I am concerned about a repeated manure and/or animal rotting smell that overwhelms our property. We live in Webb City, near Carterville, and I have been told, by multiple people, that the source is a company spreading grease and human waste in this area. I am tolerant of basic fertilizer smells, as I come from a farming background, but the odor is just horrific. I can't imagine this is okay to run off into our waterways! Some days I cannot go outside and be in my yard or garden because it is gag-inducing. Please let me know if there is anything else I can be do to get this practice changed. I'm so proud of Missouri's long history of excellent conservation work, and hate to see businesses abusing our land to make an easy dollar.

Conclusions: This activity is related to land application and exempt from odor regulations. No report of observed runoff events.
 SharePoint #10889
 Not a regulated activity.

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
59091	9/9/2024	9/16/2024	Michael Thomas	Open Burning	Exeter /Barry	SWRO	BD	Site Visit
Concerned Party:	Anonymous							
Concern Info:	Burning tires and other hazardous material on September 8, 2024.							
Conclusions:	SharePoint #10935 No violations of 10 csr 10-6.045 Open Burning Requirements were observed during the investigation.							
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
59096	9/9/2024	9/16/2024	Shell Rock NFP Windsor Bay WWTP	Odor Public Water		SWRO /Barry	DH	Email
Concerned Party:	Laron Burnett							
Concern Info:	Caller is concerned that a nearby lift station is not functioning properly. Caller states that they experience odors in the area and observe that the lift station is pumped out on a regular basis. Caller states that the lift station was being pumped out today (9/9/2024) and was pumped out again before the 4th of July this year. Caller states that they have been doing work on the lift station periodically all year and is concerned that it is not pumping to the sewage treatment plant.							
Conclusions:	I arrived in the subdivision and contacted Mike Evans to discuss the lift station located at 36.610350, -93.609174. Evans stated that the subdivision had been receiving complaints sewer odors but had not had any problems related to the lift station and sewer odors. I inspected the lift station and the area around the lift station and did not find evidence of an overflow or a malfunction at the lift station. I observed normal pump start-up noise during my time at the lift station. In addition, Mike Evans supplied a list of events in regard to the lift station from this year and last. No issues at lift station noted during investigation, no action taken. SharePoint #10944							
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
59098	9/9/2024	9/23/2024	Unknown	Bypass or Sewer Overflow Odor	Belton /Cass	CO	HL	Phone Conversation
Concerned Party:	Bill Keul							
Concern Info:	Caller has a retaining pond on property. There is a raw sewage smell coming from around the pond. There is sewer line that is located around the pond. They want to make sure no sewage is getting into the pond, not sure where it is coming from and would like pond tested to make sure sewage has not gotten into pond. Would like a courtesy call before coming out.							
Conclusions:	The concerned party wants to follow up with a laboratory to have his pond tested. The concerned party will also follow up with the city if the testing showed any water quality issues.							
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
59139	9/12/2024	9/18/2024	Kyle Prettyman	Open Burning Scrap Tire	Richland /Laclede	SWRO	GE	Letter UF
Concerned Party:	Anonymous							
Concern Info:	Neighbor burns tractor trailer tires creating smoke and water pollution. Neighbor has pile of about 60 tires or more ready to burn. Burns on a regular basis. Last burned about 30 days ago. Trees are dead around the home.							
Conclusions:	SharePoint #10994 Open burning violation Unsatisfactory findings letter							

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
59168	9/13/2024	9/16/2024	Langley's Recycling	Odor	Kansas City /Jackson	KCRO	MC	Referred to Other Agency
Concerned Party:	Anonymous							
Concern Info:	Via Webform - Submitted at 3:08 am Friday, September 13, 2024							
	Date of Incident or First Noticed: 03/04/24							
	I live near Langley's Recycling plant. Every day we drive by during the day it smells terrible and hard to breathe . I've been having respiratory issues for a few weeks now . I have no history of such issues whatsoever. I'm concerned Langley's recycling plant is affecting my health. My air purifier constantly shows the air is in the red even after running constantly. I believe a relocation is more than necessary. Can you come check the air quality? I'm afraid they are harming local residents and violating regulations.							
Conclusions:	This concern is located within the city limits of Kansas City, MO; therefore, the concern was referred to the delegated local agency, which is the City of Kansas City Health Department's Air Quality Program.							
	Kansas City's Air Quality Program (KCAQ) provided an update on 09/24/2024. They have been investigating this matter over the past week but have not detected any odors at the location during this time. KCAQ previously visited this site for open burning complaints, for which they received a warning (08/22/2024). KCAQ spoke with the manager, who confirmed they have not been burning and suggested the odor might be coming from nearby Brush Creek. During the investigation, no strong odor was detected from the creek. KCAQ noticed a few homeless camps in the area, which could potentially be another source of the odor. KCAQ will continue to monitor.							
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
59172	9/13/2024	9/17/2024	Iso Nova Technologies	Odor	Verona /Lawrence	SWRO	JW	Site Visit
Concerned Party:	Robert Jungbluth							
Concern Info:	CP reported strong odors from IsoNova last night and this morning. Wind was out of the N/NE.							
Conclusions:	SharePoint #11008							
	I arrived at the facility around 10:45 a.m. when winds were out of the southwest at 4 mph. I drove around the facility region for about 20 minutes but I did not run nasal ranger tests since the odors from the facility were so minimal. The RTO appeared to be operating during my visit which indicated that the facility was in compliance with its new permitting requirements. I left the region around 11:10 a.m.							
	I did not observe any violations during this investigation. No action is required.							
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
59205	8/26/2024	9/16/2024	Unknown	Odor	/St. Louis City	SLRO	RB	
Concerned Party:	Camilo Mejia							
Concern Info:	We received an odor concern from the DNR Website. The CP is experiencing a chemical petroleum like smell present that is irritating to breathing and makes it difficult to be outside.							
Conclusions:	I have driven to this area three different times and found no odors							

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
59206	9/11/2024	9/16/2024		Odor	St. Louis /St. Louis City	SLRO	HH	
Concerned Party:	Anonymous							
Concern Info:	Received an odor concern from the DNR website. The CP states "I've lived in St. Louis for nearly a decade and there is a recurring smell in the city. It smells of the chemicals or petroleum and makes the sky hazy when the smell is apparent. I've noticed it again since yesterday and it still happening. It's worst in the morning. It seems dangerous for outdoor activity. I know the DNR and the EPA are aware of this. Please please make it a priority to find the cause and stop the problem! The air cannot be safe!"							
Conclusions:	I did not smell any chemical or foul odor during my site investigations.							
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
59209	9/12/2024	9/16/2024	Possibly coming from Sauget, Illinois	Odor	SLRO /St. Louis City		RB	
Concerned Party:	Anonymous							
Concern Info:	We received an anonymous odor concern from the DNR webpage. The CP states "27XX Shenandoah Ave./Fox Park St. Louis City- The air has been thick these past two mornings with an acrid smell, like an electrical fire. Wind has been from the east/southeast around 7-10 mph. My household has been experiencing respiratory effects and headaches. The air was also bad last week on a few days but I didn't write it down."							
Conclusions:	No odor was present during my visit and I was able to talk with people who worked in the area, and they had smelt no odors.							
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
59213	9/17/2024	10/8/2024	Clint Walton	Fugitive Particulate Matter	SWRO /Greene		JW	Phone Conversation
Concerned Party:	Anonymous							
Concern Info:	Per Web Form: Willard North Elementary Construction dust inside the building impacting student and faculty. A report of multiple respiratory issues. Reported through a family member of faculty. Worried about asbestos and black mold exposure.							
Conclusions:	SharePoint #11045 I did not observe any violations of NESHAP regulations during this investigation. No action is required.							
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
59232	9/17/2024	9/18/2024	Unknown	Odor	KCRO /Jackson		CK	Site Visit
Concerned Party:	Anonymous							
Concern Info:	Caller reports there was a very strong smell yesterday (9/16) around 1 p.m. on Noland Road south of 40 Highway and north of 54th Street. She said it smelled like someone was "cooking a giant batch of brussel sprouts". She noted when she was back in the area at 5:30 p.m. that day, she could still smell it, but it was not as strong. Caller did not know what the source of the smell might be.							
Conclusions:	Source of odor could not be identified. There was a slight odor on Noland near 49th Street south of 40 Highway, but the odor intensity was below the regulatory limit.							

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
59239	9/17/2024	9/18/2024	St. Joseph Sanitary Landfill	Odor	St. Joseph /Buchanan	KCRO	CK	Site Visit
Concerned Party:	Suzi Hanway							
Concern Info:	CP states that they were smelling terrible odor at around 8:11 pm and did not see any activity going on at the landfill at that time. They wondered if the landfill was not covering over the waste. Believes that the smell is not healthy to breath. Stated that something needs to be done about this.....							
Conclusions:	An odor violation at the St. Joseph landfill could not be confirmed during the site visit for the investigation. Landfill personnel were unaware of any activities that would have resulted in abnormally high odors. Odor may be from the operations to move the emergency temporary storage into the active face of the landfill. Landfill estimates that this activity will likely not be complete until after Christmas.							
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
59243	9/18/2024	9/20/2024	"Home Owner"	Odor	SWRO /Jasper	MB	Other	
Concerned Party:	Gary Robinson							
Concern Info:	"There is an odor coming from somewhere near or in Carterville. It smells like an open sewer. The smell is not constant but is consistently in the morning hrs. The smell is so bad the upholstery of my furniture is beginning to have an odor. City hall claims they know nothing"							
Conclusions:	SharePoint #11052 Called CP and explained that odor from land application is an unregulated issue. No regulated activity occurring.							
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
59245	9/18/2024	9/19/2024	Casey's General Store	Odor Underground	Windsor /Henry	KCRO	JS	Site Visit
Concerned Party:	Anonymous							
Concern Info:	Via Webform - Submitted at 11:02 am Wednesday, September 18, 2024 - Date of Incident or First Noticed 09/12/24: Underground Leaking Storage Tank Issue There was a Casey's gas station on South Main Street in Windsor, Missouri in the 1980's. A petroleum odor is now invading homes and yards to the south of that location, which is also down gradient. The dry weather may have opened cracks but this needs to investigated and corrected as soon as possible. Odors can be very strong in houses. I think it is coming through foundations.							
Conclusions:	Via Webform - Submitted at 11:02 am Wednesday, September 18, 2024 - Date of Incident or First Noticed 09/12/24: Underground Leaking Storage Tank Issue There was a Casey's gas station on South Main Street in Windsor, Missouri in the 1980's. A petroleum odor is now invading homes and yards to the south of that location, which is also down gradient. The dry weather may have opened cracks but this needs to investigated and corrected as soon as possible. Odors can be very strong in houses. I think it is coming through foundations. This concern was referred to the department's Environmental Emergency Response section. No odors of concern or petroleum vapors were found in the area.							

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
59257	9/16/2024	9/17/2024	Unknown	Odor	SLRO /St. Louis City		SL	
Concerned Party:	Kara Boschert							
Concern Info:	Received an odor concern from the DNR Website. The CP states " There is a chemical and sewage smell in the mornings often in my neighborhood in Tower Grove East. It's concerning to be outside and breathing it in because I don't know what it is. "							
Conclusions:	Site visits were conducted. No violations of 10 CSR 10-6.165 were noted.							
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
59259	9/16/2024	9/19/2024	Billy Craig	Scrap Tire Dump Open Burning	Novinger /Adair	NERO	BH	
Concerned Party:	Chris Drennan							
Concern Info:	Caller stated that a resident of Novinger had reported to him that Billy & Regina Craig had a pile of 40-50 tires piled up at the city street. Stated they have burned tires a month or so ago (see ACE#58273) and burned something, perhaps trash, this morning.							
Conclusions:								
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
59264	9/19/2024		Marlainia Jones	Open Burning	Goodman /McDonald	SWRO	GE	Communication In Person
Concerned Party:	Anonymous							
Concern Info:	Open burning of tires and plastic 2 to 3 times a day causing enough smoke air pollution to restrict outside movement. Also have numerous animals on a small lot some of which have died. The runoff from this property flows right next to neighbors drinking water well.							
Conclusions:	SharePoint #11066 Open burning regulations reviewed and no further action required at this time. Revisit site if any further concerns are submitted.							
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
59266	9/18/2024		Timothy Foster	Scrap Tire Dump Open Burning General Water Quality	Galena /Stone	SWRO	GE	
Concerned Party:	Anonymous							
Concern Info:	"Tim foster has an investigation already started on him, but when the lady came out she didn't see all the tires in his dad's dump also. Since She has been out to he tried to burn part of the log jam on river to try to wash the tires down river."							
Conclusions:	SharePoint #11063

59278	9/13/2024	9/17/2024	Unknown	Odor	SLRO /St. Louis City		RB	
Concerned Party:	Sean O'Day							
Concern Info:	Received an odor concern from the EPA. The CP states " was driving east on I-64/MO 40 around midnight tonight and just after passing the market st exit began to smell something that is somewhere between burning tires and fireworks. Odor is pervasive and it is hazy from just out from under the overpass to at least Mckinkley Heights. Odor causes irritation of throat and i could not stay outside in it for longer than a few minutes.							
Conclusions:	I conducted a site and was not able to locate any strong odors.							

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
59280	9/20/2024	9/24/2024	Unknown	Odor	SWRO /Greene	BD		Other
Concerned Party:	Ricky Pendley							
Concern Info:	*See attached email for details*Please describe the odor to the best of your ability: It almost like a chemical smell sometimes it makes my eyes burn I've been smelling it off and on for a month now.							
Conclusions:	SharePoint #11087	No source of odor was identified in the field investigation. No violations were observed.						
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
59283	9/23/2024	9/24/2024	Robert Wayne Hoover	Other	Richmond /Ray	KCRO	MC	Phone Conversation
Concerned Party:	Robert Wayne Hoover							
Concern Info:	Via Webform - Submitted at 4:16 pm Friday, September 20, 2024 - Request for Assistance: Heat pump with AC/Furnace. Neither one is working. And I am 67-year-old disabled male with COPD and on oxygen and really need help to get my furnace and ac working again my caregiver has helped with window AC's, but winter is coming and very scared of freezing to death.							
Conclusions:	Based on the nature of his inquiry, he spoke with another local agency that provided him with information needed to address his concerns.

59336	9/25/2024		Jim & Loretta Fenney	Open Burning	Pierce City /Lawrence			
Concerned Party:	Brandy Argyris							
Concern Info:	Caller states that neighbors are burning plastic & rubber out of a barrel. The caller claims that the alleged source of concern has been illegally burning for over 6 months. The burning takes place in the backyard and occurs on a weekly basis. The burn barrel can be observed from a public alleyway east of the address and south of the high school. The caller requests that we call them right before and after the investigation. The caller has been informed of 10 CSR 10-6.045 and the household trash exemption.							
Conclusions:	SharePoint #11135							
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
59344	9/23/2024	9/24/2024	Southeast Electric	Other	Jackson /Cape Girardeau	SERO	GH	Memo
Concerned Party:	Anonymous							
Concern Info:	CP states he thinks a business is burning insulation off of copper wires. The business is working at a house that is being built and they have a burn pile							
Conclusions:	On September 24, 2024, Jesse Evans and I went to the area of concern and noted two (2) small burn piles at a new home build at the intersection of Broch Tuarach Place and Highway 302. There was nobody at the property, but the piles were able to be observed from the public roadway. It was unclear what was burned in the pile to the east but the pile on the west appeared to have wood products in it. On September 25, 2024, I proceeded to call the number listed as the responsible party and reached Eric Niswonger with Southeast Electric, LLC. I informed him of the concern and that Jesse and I had noted some burn piles at the location and had some questions. While discussing the concern and the location with him he stated he was unfamiliar with that location. He also indicated that the company does no burning anyway.

59362	9/26/2024		Tony & Joni Gonzales Chavarria	Animal Waste Open Burning	Seymour /Webster	SWRO	JW	Email
Concerned Party:	Pam & Douglas Leichty							
Concern Info:	Summarized webform submission: "I have a neighbor who is burning pigeon and chicken waste and feathers. He had it in his chicken pen and has moved it to the back of his property and built a barrel with a stack, he burns sometimes for 3 or 4 days straight. He hauls the waste and feathers back there and has it in grey plastic totes. We cannot have our windows open. The smell is so toxic it burns our throats and makes our eyes burn. The name of this neighbor is Tony & Joni Gonzales Chavarria. Their address is 1832 State Hwy K, Seymour, MO. They have the grandson burning the totes of waste most days. We both live on 2 acres but the smoke lays between our homes and on the gravel road to other homes. I have attached three pictures the one by the building shows the shed he is hauling the waste and feathers from, the others show the totes in back yard by the burn barrels, these were taken today, they have not started burning today yet, they start the fire at night and feed it for days and it smolders, and it is toxic to smell."							
Conclusions:	SharePoint #11149 I did not observe any violations during this investigation. No action is required.

Concern Info:	My neighbor has been burning tires, plastics, and shingles producing thick black smoke for the past 9 nights as soon as it gets dark. The smoke is so bad that i can barely see my car in my own driveway from my front door. It is also coming into my house and im having to run my air conditioning at 63 to keep it constantly going to be able to breathe in my own home. I tried calling the fire department when it was happening and the showed up for a few minutes and left without doing anything about it.							
Conclusions:	SharePoint #11162 An accidental fire prompted the fire department to be called to extinguish it. No further action is required.

59383	9/12/2024	9/18/2024	Jonas Stutzman sawmill	Open Burning	Spickard /Grundy	NERO	DB	Report UF
Concerned Party:	Anonymous							
Concern Info:	Caller reports that an Amish sawmill west of Spickard is burning sawdust 24/7/365, causing nuisance smoke. States the sawmill began operation 10 or so years ago and for the last few years has been receiving multiple semi loads of logs almost daily. Owner may or may not be named Stutzman.							
Conclusions:	At the site, I observed a large pile of wood waste being burned. I spoke with Jonas Stutzman, the sawmill owner, and discussed the concern. He said his sawmill produces about 8,000 board feet per day. I informed him that the Missouri open burning rule has restrictions that apply to sawmills of that size and larger, including 200 yard setback distance and to only burn during the day. He said sawdust doesn't extinguish easily and they can't put it out at night. I recommended they burn smaller piles or find alternative means of disposal. I provided a fact sheet and a copy of the open burning rule. On returning to the office, I measured the distance from the burn pile to buildings on other properties using Google Maps and found it was about 220 yards.

59406	9/18/2024	9/19/2024	Arch Enterprises Lakeview Site	Opacity	Mexico /Audrain	NERO	DB	Site Visit
Concerned Party:	Anonymous							
Concern Info:	On 09/17/24 at approximately 1905 hours, The Mexico public safety department responded to a reported warehouse fire on Lakeview Road. It was Arch's facility on Lakeview. Black smoke was blowing from a stack on the back of the building. Nobody was at the facility at the time of the burning. An employee was contacted who responded and addressed the issue. He stated Lightsey lit the kiln just before they all left but apparently failed to turn the reburner up enough to properly clean the smoke.							
Conclusions:	No violation found during the investigation. City inspector took photos showing excessive emissions, but I found no visible emissions during my site visit. 9/25 I observed a startup beginning 10 AM and ending two hours after both kilns were fully active, finished 1315. Noted minor odors downwind of the stack, did not observe opacity during my site visit.

Concerned Party:	Anthony Kitchen							
Concern Info:	Email states, "The concern is an awful smell emitting from the bushes at my apartment complex. During I'd say 8am-1pm and sometimes later depending on the wind direction and I guedd moisture the smell is noticeable. The bushes are located between Taylor St and Farror St on the West Side of Morley right in front of the Law Case Building. There are times that odor also drifts back to the parking lot. It literally stinks out the area outside My windows and comes in my apartment. I thought it was the waste pond but after have a DNR employee come here we have found it's the bushes. It smells awful and forces me to not be able to open my window or turn on my HVAC wall unit. I have sent multiple email to the Moberly Housing Authority and they have ignored the complaints and have not contacted Mr regarding this issue. Not really sure when it started but since moving to this apartment and during warmer weather it has been very noticeable."							
Conclusions:	no odor violation

Concerned Party:	Jon Billiter							
Concern Info:	CP states that neighbor is burning trash in their back yard near his fence line. States that there is a mattress frame on the pile currently. Reported that neighbor had a big fire on October 2 at approximately 8:40 p.m. In addition, the neighbor was having a big beach fire going on in the backyard and there was a big boom like they were burning combustibles. The burn pile can be viewed from the back portion of CP property. CP will be out of town for a few days and has provided alternate telephone number for individuals that live in the household so the Department can have access to view the burn pile. CP reports that house is in a trust and the owner recently died and owner's daughter now owns the house, but it appears to have multiple renters that come and go. The owner does not live there. CP also reports that they had called 911 and the police did go by the property but were not there very long.							
Conclusions:	Prohibited items (a piece of furniture and a mattress) appear to have been burned. Due to difficulty identifying and communicating with the responsible party, a compliance assistance letter detailing the open burning regulations are being sent to the residence and the owner of the property. Further investigation will be conducted if reports of burning continue.

Concern Info:	The following was submitted on the Department's online concern webform: "Date of Incident or Date First Noticed 07/21/2022 Please describe your concern, including the location on the property. Giant piles of trash being burnt and then buried. Was hearing a lot of noise and tractor sounds so With my drone I flew over properties surrounding mine and seen located across the field several piles of tires, metal, furniture and trash. There was a man approximately his mid 30s adding to a pile that is approximately 15 to 20 ft tall. Later that night I went out to walk the dog could smell a strange smell the power was smelting and had been burnt then a few months later heard the big machine again so investigated and seen him burying it under the ground. This has continued and currently He is building another pile didn't think much of it until recently when my water started tasting funny. Could someone please check this out. When you're on the driveway located behind what seems to be an earthen type house and a shed before you get to the warehouse building Outback by a greenhouse frame. You can't miss it it's huge gigantic this time seems to be a lot of wood but under it is where he's buried all in that area several piles through the last few years since I noticed. Apologize for not reporting before now"							
Conclusions:	A letter has been sent to the SC requesting details for where the waste will be disposed of and a statement from the SC that no improper burning of wastes will be done.

Concern Info:	Received an odor concern from the EPA. The CP states: " I have smelled something like burning or chemicals since moving to Soulard in June 2023. Other people here notice it too, so I googled Burning smell in Soulard last year and learned of the Cory Bush EPA Inquiry. My boyfriend has lived here since 2018 and is suffering from an immune disorder that cannot be diagnosed. He's had tons of extensive testing with different doctors yet another blood test at the end of this week from a neurology doctor. He is in a lot of pain and it's affecting our quality of life greatly. We have talked about the smell a couple of times, but he has gone nose blind to it and I don't bring it up because I don't want to make him feel bad or feel like he has to move from this place that he loves, but I still smell it. It's not strong, but it's definitely industrial and even happens on the weekends. It smells like something we should be inhaling. I didn't include our address because I don't want it to come up in some searches if he tries to sell this house. The reporting says that the EPA has identified some targets of this. Please help us.							
Conclusions:	During my site visit there were no odor violations occurring

59494	9/24/2024	9/26/2024	Lynn Lewis	Open Dumps Animal Waste Odor	Green City /Sullivan	NERO	JB	Communication In Person AC
Concerned Party:	Allison Ayers, Mayor							
Concern Info:	Caller stated that Lynn Lewis and her husband refuses to have city trash service and her back yard is looking like a landfill. Caller stated that there are 80-100 cats. Waste is mostly residential waste and cat waste. Worried about public health, located next to the playground/park, "Exhausted all options". Caller stated that there is a bad smell and the waste is not leaving the property. Caller stated that Lynn Lewis and her husband have not been cooperative and not paying fines. Has been an issue for 3-4 years and getting worse.							
Conclusions:	No violations of the MSWML observed. At the time of the investigation, the waste observed on the property appeared to be bagged residential waste. Additionally, usable items consisting of pallets, coolers, pet crates, used tires, and lumber were observed on the property. The items were identified as usable and are exempt from regulation as a solid waste. Administratively Closed on September 27, 2024.

Concerned Party:	Michael Hite							
Concern Info:	17 n Main Street was shoveling asbestos dust into an unmarked dumpster from the second floor of the building, dusting the entire area with asbestos. I sent in samples to verify it was asbestos. Tests came back positive. I have the test results along with video and picture evidence of the damage. This building has a business in the bottom part that's a medical facility and the workers contaminate the facility by walking through it with dust all over them. I notified the cleaning company who recently did a cleaning and they cleaned without hazmat suits anyways. I also have evidence of the conversations I had with Servpro regarding contaminants and I sent them test results. So far nobody is listening. This is a medical facility with asbestos being tracked into the facility. Body beautiful is the business located at this address.							
Conclusions:	It does not appear that any regulated renovation was occurring, only cleanout of items and debris, which is not an activity regulated by the department. It was recommended to the concerned party to contact OSHA with any concerns about asbestos dust exposure from those activities.

59506	10/9/2024	10/11/2024	John Hoover	Open Burning	Buckner /Jackson	KCRO	JS	Site Visit
Concerned Party:	Anonymous							
Concern Info:	CP called and stated that John Hoover was burning, potentially, upholstery or some other items that cause a strong acidy smell at night behind the long shed. CP stated it leaves a strong smell in their house the next morning and hurts their lungs. CP stated that Hoover has been working with Jackson County to clean up the property and have been burning about 3-4x per week for the past two weeks. CP stated they burn after dark around approximately 8-9 pm. CP stated they wish to remain annoymous due to retaliation and have installed security cameras on their property. CP stated Hoover also houses individuals from jail/prison in the back shed to help with yard work which makes them uneasy. CP stated you can see the location of the burn site from the road along with potential other objects they plan to burn.							
Conclusions:	No violations were observed during the investigation. The open burning regulation was discussed with the property owners. A fact sheet on open burning and a copy of the open burning regulation were provided.

Concerned Party:	Chris Bell							
Concern Info:	We received an open burning concern from the EPA. The CP states: "Man and woman burning plastic and rubber from old appliances on a regular basis. On September 11th and 12th, the fire department and sheriff's were dispatched. Due to the fire and thick smoke. Neighbors complaining that we can not breathe and the smoke burns our throat. The owner of the home stated that he would talk to the tenants. Today at 3:20pm, I observed heavy smoke from their backyard.							
Conclusions:	I conducted a site visit and I saw no violation. There seems to be some potential open burning occurring so I am sending a compliance assistance letter to the owner.

59569	10/15/2024	10/17/2024	Springfield Iron and Metal	Fugitive Particulate Matter	Springfield	SWRO	CR	Site Visit
					/Greene			
Concerned Party:	Jeff Davis							
Concern Info:	From email (email attached separately): Please see photos below and the attached photo of a piece of shrapnel found on BNSF property in our Springfield yard on October 8. Springfield Iron & Metal routinely causes these explosions with their "car shredder" that send gas clouds and dust particles wafting over our property. More importantly, these explosions continue to catapult pieces of shrapnel from the automobiles or whatever they are crushing onto BNSF property near where our employees are working.							
				In one of our previous conversations over Skype or Zoom, then Deputy Director Mike Sutherland offered his legal opinion the Missouri Department of Natural Resources has no jurisdiction. I am still concerned Springfield Iron & Metal's continuing course of conduct poses a threat to the safety of BNSF employees working in the yard there as well as any nearby homeowners who are also likely experiencing particulate matter from these explosions drifting across their property in the early morning hours and never knowing it. I simply cannot comprehend and find it unfathomable that some law or regulation for which Missouri Department of Natural Resources has enforcement authority is not being violated.				
				Please take notice these events are still occurring, that BNSF continues to record these events as they occur, and I would respectfully ask that you refer this matter to the Missouri Attorney General's Office for an independent review.				
				Sincerely,				
				Jeff Davis BNSF Railway				
Conclusions:	SharePoint #11340			There were no air or solid waste violations at the time of the visit. Bussard did observe water pollution violations during his inspection and there are hazardous waste concerns that are prompting a full inspection. A memo has been sent to update the programs due to the facility's ongoing AOC.

59572	10/15/2024	10/15/2024	Rodney Delmont	Asbestos Open Burning	Weaubleau /Hickory	SWRO	JW	Phone Conversation RTC
Concerned Party:	Anonymous							
Concern Info:	Anonymous caller states that Weaubleau High School hired a contractor to demolish three houses. There has not been a demolition notification for this project and the caller alleges that the contractor will burn the materials. The caller would not provide much information but they stated that the demolished houses are located east of the high school. The demolition began on October 14.							
Conclusions:	SharePoint #11332			I observed evidence of demolition of two residential structures ordered by a local school district within one year. Because the demolition did not involve a notification to the department nor asbestos inspection, this qualifies as a violation under NESHAP regulations. An unsatisfactory finding is being issued because the scale of the demolition was small but still regulated.

59619	10/4/2024	10/4/2024	N.B. West Contracting Company - Pacific Asphalt	Fugitive Particulate Matter Odor	Pacific /Franklin	SLRO	SL	
Concerned Party:	Cathryn							
Concern Info:	CP called to state that her property was being covered in what appeared to be asphalt dust from nearby asphalt facility. CP states that she has cleaned off her mailbox multiple times and that her property is slightly covered in dust. She also states that the odor during operations is bad. She is willing to speak to the inspector who goes out and wants to show the residue building up on her property. She stated that the plant will close at the end of October.							
Conclusions:	A site visit was conducted. It was determined that the particulate emissions might be coming from truck traffic on the public roadway. NB West stated they would post more signs for truck drivers to clean off trucks before leaving the property and to prevent trucks from turning right out of the property. The trucks and the drivers are not employed or owned by NB West, and would be considered mobil sources. Mobil sources are not regulated by DNR.

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
59644	10/4/2024	10/4/2024	Earnest Kleier	Open Burning	Festus /Jefferson	SLRO	MC	
Concerned Party:	Lisa Kutz							
Concern Info:	The CP called in about their neighbor, Earnest Kleier at 1521 Hwy 61, Festus MO. The CP stated that the alleged party (AP) has been gathering construction materials in a burn barrel behind the house and is worried they will begin burning the materials. The CP stated that the AP has burned construction materials in the barrel in the past, and is confident that it will happen again. The construction materials are described as treated wood, painted wood, rubber products, and other household building materials. The AP owns several properties, and the CP believes that materials from the other properties are hauled in and burned. The AP usually starts the fires, and then leaves the property and fires unattended. There is no water hose or controls available in an emergency. The CP believes the house has no running water. The AP does not live at the residence, and does not check the mailbox at the property. The CP stated that they are welcoming any inspector to enter their property to view the burn barrel and the materials.							
	I told the CP that we can investigate the property, but if we find no evidence of burning we cannot issue any compliance actions. They asked if we could send our compliance assistance letters to Earnest's mailing address (1527 Hwy 61, Festus MO). I told them that after an investigator is assigned the concern, the investigator will reach out about next steps. I also told them to contact the fire department if the AP begins burning, and that the fire department should write down the items burned.							
Conclusions:	No open burning was witnessed during the investigation and no incident reports exist from the fire department. There was however evidence that treated wood is being burned on the property. Therefore fact sheets are being sent to the SoC to inform them that the open burning alleged is a violation of Missouri Conservation Commission Regulation 10 CSR 10-6.045, "Open Burning Requirements". The CP also requested a copy of fact sheets for their own personal knowledge and reference. (PUB02047 "Facts on Open Burning Under Missouri Regulations." & PUB2045 "Managing Construction & Demolition Waste")

Concerned Party:	Rosewood Homeowners Association							
Concern Info:	We received an open burning concern from the Rosewood Homeowners Association about a property located at 3550 Gravois Road in Byrnes Mill. Mr Haskins has a tree removal service and also sells firewood. Mr Haskins has been burning wood from his tree removal service for years. Mr. Haskins is now burning tree waste from other tree services and is getting compensated for that service. Mr. Haskins is now burning on a commercial level with not the proper facility to do so. None of the wood is generated from his own property. Mr. Haskins burns wood day and night also weekends. The Rosewood subdivision is about 300 feet from Mr. Haskins burning pile. The residents of Rosewood are unable to open their windows in their homes or sit outside on most days. We have some residents that are reporting health issues from this continually burning.							
	The Rosewood homeowners association was informed by homebuilding contractor that Mr. Haskins does not have the proper facility to burn openly year-round. The Rosewood homeowners association is asking that the practice of burning tree waste at 3550 Gravois Rd. Byrnes Mill Mo be stopped immediately.							
Conclusions:	A site visit was conducted, and a violation of 10 CSR 10-6.045 was noted. A letter of warning will be issued.

Concerned Party:	Joe Crabtree							
Concern Info:	Sawdust and black debris landing on neighbor's vehicles. This is coming from saw mill across the road							
Conclusions:	No violations of 10 CSR 10-6.170 Restriction of Particulate Matter were observed during this investigation. An inspection may be conducted at this site due to the facility recently permitting an air curtain incinerator.

Concerned Party:	Tiffany Blattner							
Concern Info:	We received an odor concern from the I-70/I-270 Area Online Website. The CP is experiencing a tar/asphalt and something else that is making all of us in the area nauseous and we can't open windows or spend any time outside.							
Conclusions:	At the time of my site visit there was no odor violation occurring.
